	Total net emissions/business/m2 floor space	<u>0.136</u>

This information was collated and reported upon, in line with the methodology set out in the UK Government's Environmental Reporting Guidelines, 2019. Emissions have been calculated using the latest conversion factors provided by the UK Government. There are no material omissions from the mandatory reporting scope.

Since 2017, the Company has purchased green electricity for all its sites, with the result that net emissions in the period to 30 September 2020 were reduced by 1,420 tCo2e. In addition, the replacement of the light fittings with energy efficient LEDs continues. Improvements to tray washers, boilers and refrigeration, continue to save electricity and water usage. Energy efficiency teams have been created at each site, with the objective of driving energy efficiency projects.
