DIRECTORS' REPORT (continued)

Policy on Health and Safety

The company accepts its responsibility to ensure the health and safety of all employees and contractors working on its sites. The Board carefully monitors health and safety performance by reviewing accident statistics at each meeting. A detailed report on health and safety (including process safety) objectives and performance is given to the Board annually. There were no fatalities or major injuries at any of the company's sites during 2020.

Political contributions

The Company made no political donations or incurred any political expenditure during the year.

Report on Environmental Protection

The company takes seriously its responsibility to minimise the impact of its activities on the environment. To support this objective, the Dalry site has an Environmental Management System accredited to the international standard ISO14001. This standard requires an annual review of environmental performance and the setting of objectives to ensure continuous improvement.

Streamlined Energy and Carbon reporting (SECR) Statement

Introduction

The below statement contains DSM Nutritional Products (UK) Limited's annual energy consumption, associated relevant greenhouse gas emissions, and additional related information, as required under the Companies (Directors' Report) and Limited Liability Partnerships (Energy and Carbon Report) Regulations 2018.

Methodology

The methodology applied to the calculation of Greenhouse Gas emissions is the 'GHG Protocol Corporate Accounting and Reporting Standard'. An 'operational control' boundary has been applied. Carbon conversion factors have been taken from 'UK Government GHG Conversion Factors for Company Reporting – 2020'. Emissions are reported as CO₂e. Electricity emissions have been reported as 'location' based.

DIRECTORS' REPORT (continued)**Energy Use and Greenhouse Gas Emissions**

The table below shows the total annual UK energy use and associated GHG emissions relating to the consumption of; electricity, natural gas, other fuels combusted on-site, and fuel consumed for relevant business transport purposes, for the period 1st January – 31st December 2020.

Table – Energy Consumption and Emissions 2020	
On-site combustion (kWh)	618,210,952
Electricity (kWh)	6,487,635
Road Transport (kWh)	223,073
Total Energy (kWh)	624,925,277
Scope 1 Emissions (tCO ₂ e)	113,692
Scope 2 Emissions (tCO ₂ e)	1,513
Scope 3 Emissions (tCO ₂ e)	57
Total Emissions (tCO₂e)	115,262
Emissions Intensity (tCO₂e/£m)	564

Emissions Intensity

For purposes of baselining and ongoing comparison, it is required to express the emissions using a carbon intensity metric. The intensity metric chosen is £m turnover. The resultant emissions intensity, using location-based emissions, is 564 tCO₂e/£m turnover.

Energy Efficiency Action

DSM has committed to decouple emissions from economic growth reducing 50% of emissions from operations (scope 1 and 2) in absolute terms by 2030. During 2020 we undertook a number of activities to reduce our energy consumption and associated carbon emissions, aligned to our long-term corporate goal to reduce emissions. A major focus was the reduction of steam use and losses at our Dalry manufacturing facility via projects such as; optimisation of the steam distribution system, the use of hot water rather than steam, replacement of steam with waste heat and flash steam recovery. Steam consumption is now monitored in 'real-time' via our energy dashboard enabling a quick response to any deviations in demand. Energy is closely monitored and managed, with monthly review meetings taking place involving senior management. Over the past five years we have reduced our energy input per kg of product output by 25%. Further improvements are planned for 2021 including further improvements to the steam distribution system, the introduction of additional heating controls, and the installation of low energy LED light fittings.

Disclosure of information to the auditors

The directors who held office at the date of approval of this directors' report confirm that, so far as they are each aware, there is no relevant audit information of which the company's auditor is unaware; and each director has taken all the steps that he ought to have taken as a director to make himself aware of any relevant audit information and to establish that the company's auditor is aware of that information.
