

AQUALISA PRODUCTS LIMITED

STRATEGIC REPORT *(continued)*
FOR THE YEAR ENDED 31 DECEMBER 2020

KEY PERFORMANCE INDICATORS (KPIs) *(continued)*

Energy Efficiency KPIs *(continued)*

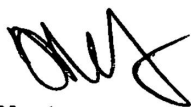

Methodologies used to calculate the information disclosed

Energy usage from gas and electricity was collected from utility bills, and the transport energy use was calculated from fuel card invoices. The relevant Tonnes of CO₂ emitted (CO₂e) was determined by using factors from UK Government GHG Conversion Factors for Company Reporting.

Methodology used to calculate the ratio which expresses the company's annual emissions in relation to a quantifiable factor associated with the company's activities.

Net units shipped amounted to 278,382. This was divided by 472, the total tonnes of CO₂e, to arrive at a reportable metric of 1.696 tonnes of CO₂e for every 1000 products shipped. An easier metric to visualise could be 1.696 kg CO₂e per unit shipped.

This report was approved by the Board on 16 December 2021 and signed on its behalf by:
