

Summary of other Group Emissions

Excluding the generation and supply of electricity, including the emissions (Scope 1) relating to Huntstown that are covered elsewhere in this report, this section presents a summary of key Scope 1 and 2 emissions for the Group, as well as a selection of relevant Scope 3 emissions.

In FY21 Covid-19 has had a notable impact on transport and office use during the year but a significant saving has also been achieved by switching the offices in NI to a new green electricity product offered by Power NI.

Scope	Activity	FY21	
		tCO ₂ e	tCO ₂ /FTE
Scope 1	Company vehicles	68.7	0.09
Scope 2	Energy use (Green electricity tariff, heating oil and gas)	25.2	0.03
Scope 3	Business travel (grey fleet + air travel)	23.4	0.03
	Water	0.6	0.00
	Waste to landfill	0.3	0.00
Totals		118.2	0.15

Not included in this analysis, or in the electricity section above, is the Group's retail supply of natural gas. This gas is procured from third parties in Ireland and Great Britain, and supplied to our business and residential customers. Retail gas sales in FY21 equate to approximately 560,000 tCO₂.

In addition, a number of water efficiency measures were put in place at Huntstown over the course of the year that have resulted in a saving of 3,713 cubic meters of water in FY21.
