**JAGUAR TOPCO LIMITED**

---

**DIRECTORS' REPORT (CONTINUED)**  
**FOR THE PERIOD ENDED 30 MAY 2021**

---

**Energy reporting**

We are required to comply with Streamlined Energy & Carbon Reporting (SECR). Under the new SECR legislation we are mandated to include energy consumption, emissions, intensity metrics and all energy efficiency improvements implemented in our most recent financial year.

All electricity and gas invoices have been entered into a fully managed energy database covering 1st June 2020 to 31st May 2021, and data quality checks have been carried out for data completeness and accuracy. All transport information has also been entered into the energy database up to 31st May 2021.

There were a number of instances, equating to 2% of the total reported consumption, where it was necessary to calculate some estimated consumption to achieve 100% data coverage.

**Consumption (kWh) and Greenhouse Gas emissions (tCO<sub>2</sub>e) Totals**

Scope 1 consumption and emissions relate to direct combustion of natural gas, and fuels utilised for transportation operations, such as company vehicle fleets.

Scope 2 consumption and emissions relate to indirect emissions relating to the consumption of purchased electricity in day-to-day business operations.

Scope 3 consumption and emissions relate to emissions resulting from sources not directly owned by the reporting company. For the Group, this is related to grey fleet (business travel undertaken in employee-owned vehicles) only.

The total consumption (kWh) figures for energy supplies reportable by the Group are as follows:

Utility and Scope	2020/21 UK Consumption (kWh)	2019/20 UK Consumption (kWh)
Grid-Supplied Electricity(Scope 2)	3,727,651	4,106,483
Gaseous and other fuels(Scope 1)	2,833,682	3,033,987
Transportation(Scope 3)	217,705	158,891
Total	6,779,038	7,299,361

The total emission (tCO<sub>2</sub>e) figures for energy supplies reportable by Jollyes Group Limited are as follows:

Utility and Scope	2020/21 UK Consumption (tCO <sub>2</sub> e)	2019/20 UK Consumption (tCO <sub>2</sub> e)
Grid-Supplied Electricity (Scope 2)	869	1,050
Gaseous and other fuels (Scope 1)	534	558
Transportation (Scope 3)	52	38
Total	1,454.69	1,454.69

**Intensity Metric**

An intensity metric of tCO<sub>2</sub>e per m<sup>2</sup> and per £m turnover has been applied for the annual total emissions of Jollyes Group Limited. The methodology of the intensity metric calculations is detailed in the appendix, and results of this analysis is as follows:

Intensity Metric	2020/21 UK Intensity	2019/20 UK Intensity
	Metric	Metric
tCO <sub>2</sub> e / £m turnover	18.91	24.2
tCO <sub>2</sub> e / m <sup>2</sup>	0.039	0.026
