
CROSSROADS GROUP LIMITED

DIRECTORS' REPORT (CONTINUED)
FOR THE YEAR ENDED 31 DECEMBER 2020

Greenhouse gas emissions, energy consumption and energy efficiency action

An 'operational control' approach has been used to define the Greenhouse Gas emissions boundary¹.

This approach captures emissions associated with the operation of the building of Crossroads Truck & Bus Limited and company-owned and grey fleet transport.

This information was collected and reported in line with the methodology set out in the UK Government's Environmental Reporting Guidelines, 2019.

Emissions have been calculated using the latest conversion factors provided by the UK Government. There are no material omissions from the mandatory reporting scope.
