#### Quantification and reporting methodology

We have followed the 2019 HM Government Environmental Reporting Guidelines. We have also used the GHG Reporting Protocol - Corporate Standard, Defra's Environment Reporting guidelines, and the 2020 UK Government's Conversion Factors for Company Reporting.

#### Intensity measurement

The chosen intensity measurement ratio is total gross emissions in metric tonnes CO<sub>2</sub>e per employee.

#### Measures taken to improve energy efficiency

The group is committed to monitoring and working to reduce our energy use. As part of this commitment we have implemented a range of measures across the group to improve energy usage. These include a major project replacing all of the lighting in the factory, office and warehouse areas over several sites. Amongst other initiatives we have also upgraded air conditioning units to more efficient units using evaporation rather than refrigeration. We have a framework to ensure a program of continual improvement as part of the CCL.
