

## SLH SWANSEA LIMITED

### DIRECTORS' REPORT (CONT.)

#### Greenhouse gas emissions and energy consumption

The group's strategy includes monitoring and targeted reduction of its carbon emissions and the following has been extracted from the group's Streamlined Energy and Carbon Reporting data:

	Unit	2021	2020
Emissions resulting from activities for which the company is responsible	tCO2e	22131	38278
Emissions resulting from purchase of electricity by the company for its own use	tCO2e	235	227
Total emissions	tCO2e	22366	38505
Total energy consumed	MWh	3450	6233

The group has referred to the HM Government Environmental Reporting Guidelines and The GHG Reporting Protocol - Corporate Standard in calculating the reported energy use and equivalent greenhouse gas emissions.

The directors recognised the group's responsibilities in relation to the environment and have introduced systems to develop and monitor the reduction of the group's carbon footprint. The group is targeting a reduction in direct emissions and embarked upon a review designed to significantly reduce the company's carbon footprint in future years. It can be seen that a significant reduction was made in 2021 over the 2020 figures.

#### Events after the end the reporting period

The directors do not consider there to be any significant events to note since the balance sheet date as at 31st July 2021.

#### Disclosure of information in the strategic report

Included in the company's Strategic Review is a review of the business, details of the use of financial instruments, and a disclosure of principal risks and future uncertainties faced by the company.

#### Going Concern

The financial statements have been prepared on a going concern basis which the directors consider to be appropriate for the following reason:

The directors prepare rolling 12 months financial forecasts for the group on a realistic and worst-case basis which includes severe but plausible downsides. These indicate that the group would have sufficient funds available to meet its liabilities as and when they fell due for that period. Consequently, the directors are confident that the group would have sufficient funds available to meet its liabilities as they fall due for at least 12 months following the approval of the financial statements and have therefore prepared the financial statements on a going concern basis.
