Total gross emissions		513.56		1,258.89
Intensity ratio				
tCO2e per sq. ft('000)		1.37		3.27

##### Quantification and reporting methodology

We have followed the 2019 HM Government Environmental Reporting Guidelines. We have also used the GHG Reporting Protocol – Corporate Standard and have used the 2020 UK Government's Conversion Factors for Company Reporting.

##### Intensity measurement

The chosen intensity measurement ratio is total gross emissions in metric tonnes CO2e per sq. ft, the recommended ratio for the sector.

##### Measures taken to improve energy efficiency

We are working with an energy consultant to conduct a forensic analysis of the site energy consumption for each store in order to highlight the higher energy users for primary focus. We have continued with our programme of installing LED lighting across stores and have drastically reduced mileage travelled by utilising teleconferencing to communicate with teams.

#### Statement of disclosure to auditor

So far as each person who was a director at the date of approving this report is aware, there is no relevant audit information of which the company's auditor is unaware. Additionally, the directors individually have taken all the necessary steps that they ought to have taken as directors in order to make themselves aware of all relevant audit information and to establish that the company's auditor is aware of that information.

On behalf of the board
