

Millbrook Healthcare Holdings Limited (formerly Cairngorm Acquisitions 9 Topco Limited)

Directors' Report (continued) For the Year Ended 30 June 2021

Greenhouse gas emissions, energy consumption and energy efficiency action

We fulfil the statutory requirements for Streamlined Energy and Carbon Reporting which includes disclosure of the company's carbon emissions. Under the Companies Act 2006 / SECR Regulations, 'Large' companies are required to report their annual emissions in their directors' report.

Millbrook Healthcare Ltd Streamlined Energy and Carbon Reporting statement covers the reporting period 1st July 2020 - 30th June 2021 and has been prepared in line with the requirements of the Streamlined Energy and Carbon Reporting regulations and the relevant areas of the Greenhouse Gas ('GHG') Protocol Corporate Accounting and Reporting Standard.

A 'Dual Reporting' methodology has been used to indicate emissions using UK electricity grid average emission factors (known as the 'Location Based' method), and also emissions using supplier specific generation emission factors (the 'Market Based' method).

No energy efficiency actions were taken during the reporting period. However, the company strategy has been to purchase renewable energy backed by Renewable Electricity Guarantees of Origin (REGO) certificates. Through this strategy, within the above 2020/2021 total energy consumption, the company has sourced a total of 1,168,415.00 kWh of REGO backed (zero emission) electricity equating to 65.79% of total electricity use.

	Location Based 2021	Market Based 2021
Total energy consumption (kWh)	18,253,819.05	18,253,819.05
Emission Type	Amount (tCO ₂ e)	Amount (tCO ₂ e)
Combustion of gas (Scope 1)	580.274	580.274
Combustion of fuel for transport (Scope 1)	3,103.587	3,103.587
Purchased electricity (Scope 2)	377.091	204.3431
Transmission and Distribution (Scope 3)	33.370	18.084
Business travel in rental cars or employee-owned vehicles where company is responsible for purchasing the fuel	50.557	50.557
Carbon intensity (Emissions of tCO ₂ e / £m sales revenue)	33.791	32.2581
Total energy consumption	4,144.879	3,956.845
