

TFS Buying Limited

Directors' Report (continued) For the Period Ended 27 March 2021

Greenhouse gas emissions, energy consumption and energy efficiency action

Consumption (kWh) and Greenhouse Gas emissions totals

The 2019/20 figures make up the baseline reporting for the Group, as 2019/20 was the first year that the Group were required to report this information.

Scope 1 consumption and emissions relate to direct combustion of natural gas, and fuels utilised for transportation operations, such as company vehicle fleet, and grey fleet.

Scope 2 consumption and emissions relate to indirect emissions relating to the consumption of purchased electricity in day to day business operations.

The total consumption (kWh) figures for energy supplies reportable by the Group are as follows:

Utility and Scope	2020/21 Consumption (kWh)	2019/20 Consumption (kWh)
Grid-Supplied Electricity (Scope 2)	1,920,094	2,668,642
Gaseous and other fuels (Scope 1)	24,494	27,271
Transportation	35,644	53,687
Total	1,980,232	2,769,600

The total emission (tCO₂e) figures for energy supplies reportable by the Group are as follows:

Utility and Scope	2020/21 Consumption (tCO ₂ e)	2019/20 Consumption (tCO ₂ e)
Grid-Supplied Electricity (Scope 2)	447.65	687.22
Gaseous and other fuels (Scope 1)	4.50	5.01
Transportation	8.44	12.84
Total	460.59	705.07

Intensity Metric

An intensity metric of tCO₂e per number of stores has been applied for the annual total emissions of the Group. The results of this analysis are as follows:

	2020/21 UK Intensity Metric	2019/20 UK Intensity Metric
tCO ₂ e per number of stores	2.28	3.49
