
MUSTARD GLOBAL LIMITED

DIRECTORS' REPORT (CONTINUED)
FOR THE 36 WEEKS ENDED 2 JANUARY 2021

Greenhouse gas emissions, energy consumption and energy efficiency action

In accordance with disclosure requirements for large groups under the Companies Act 2006, the table below shows the Group's greenhouse gas emissions during the financial year. The emissions stated below cover the 12 month period from January 2020 to December 2020.

The methodology used to calculate our emissions is based on HM Government Environmental Reporting Guidelines: including streamlined energy and carbon reporting guidance (March 2019) and UK Government GHG Conversion Factors for Company Reporting.

The Group continues to work with its suppliers and partners to reduce carbon emissions by reducing consumption and exploring alternative solutions.

To compare the emissions efficiency of the business year on year as the business changes, metrics have been used to analyse emissions and to measure progress:

	2 January 2021 Tonnes of CO2 equivalent
Direct emissions: combustion of fuel and operation of facilities (scope 1)	-
Indirect emissions: electricity, heat, steam and cooling (scope 2)	177.1
Other indirect emissions relating to electricity transmission and distribution losses, air travel and non-company cars (scope 3)	53.7
Total	<u>230.8</u>
tCO2e per employee	<u>0.36</u>

Branches outside the United Kingdom

The Company does not have any branches outside of the United Kingdom.

Disclosure of information to auditor

Each of the persons who are directors at the time when this Directors' Report is approved has confirmed that:

- so far as the director is aware, there is no relevant audit information of which the Company and the Group's auditor is unaware, and
- the director has taken all the steps that ought to have been taken as a director in order to be aware of any relevant audit information and to establish that the Company and the Group's auditor is aware of that information.
