

JJ FOOD HOLDING CO LTD

STRATEGIC REPORT (CONTINUED)

FOR THE YEAR ENDED 31 MARCH 2021

Carbon reporting and the environment

The group supports the drive for sustainable business and reducing the impact on the environment and has developed a sustainability policy. The group's vision on sustainability is "to conduct business responsibly, to the benefit of all stakeholders and with reference to relevant Sustainable Development Goals as set by the United Nations"

The group is required to make disclosures under Companies (Directors' Report) and Limited Liability Partnerships (Energy and Carbon Report) Regulations 2018:

	2021		2020	
	Energy use in kWh	Greenhouse gas emissions in kgCO ₂ e	Energy use in kWh	Greenhouse gas emissions in kgCO ₂ e
Electricity	8,649,600	2,016,568	7,091,661	1,812,629
Gas	485,192	89,212	438,058	80,537
Transport	12,707,077	3,056,942	10,203,681	2,578,164

GHG intensity per £100 of sales is 2.332kgCO₂e (2020: 1.951kgCO₂e). The most significant reason for this increase was due to the additional transport mileage resulting from the pivot to the direct to customer next-day delivery service, as necessitated by the pandemic.

GHG emissions are from operationally controlled activities in accordance with WRI/WBCSD Reporting Protocols (Revised edition) using 2020 BEIS conversion factors.

The principal action taken for increasing the group's energy efficiency during the year was to complete the purchase of a new vehicle fleet to meet LEZ requirements and this has continued to be implemented during the current year. It is too early to quantify the resulting energy saving.

The group continued replacing lighting and equipment during maintenance with LED lighting and energy efficient equipment and all staff are encouraged to conserve energy wherever possible.

On behalf of the board

Mr. M. H. Kiamil
Director
