Trains and local travel	1.17
Flights	0.00
	10.97
Total gross emissions in metric tonnes CO2e	151.80
Intensity ratio Tonnes CO2e per £1m Turnover	0.70

Brook Street (UK) Limited operate our facilities and business processes in a manner that is harmonious with the communities in which we are located. We will comply with the spirit and letter of applicable environmental regulations including national and local laws relating to the protection of employees, the public and the environment.

We take responsibility for developing and maintaining local environmental management policies, practices, guidance and training as appropriate to the local business environment. We will reduce energy consumption and resulting greenhouse gas emissions from our office activities, through cost-effective measures wherever possible. We will limit business travel whenever possible; when travel is necessary, we will choose the most cost-effective and lowest impact transportation modes available.

As a professional services company our environmental impact has always been relatively small. The shift to remote working and radical reduction in business travel during COVID-19 have highlighted opportunities for organizations like ours to reduce our impact even further. As we build back better as part of the recovery, we are committed to adjusting our business model to support sustainable ways of working and our Global Environmental Management Policy and Guidance provides practical examples of how we can deliver on these commitments at the local level.

Our participation in the Carbon Disclosure Project (CDP) means we can be transparent about our initiatives and impact to global stakeholders, while supporting us in identifying opportunities for improvement. In 2019, we completed our 9th CDP Report and received a rating in the "Awareness" band, on par with industry and regional averages.
