G. WALTERS (HOLDINGS) LIMITED

REPORT OF THE DIRECTORS

For the year ended 28 February 2021

Streamlined energy and carbon reporting

G Walters (Holdings) Ltd: Greenhouse gas emissions and energy use data for the period March 2020 to February 2021.

Type of Activity	Mar 20 – Feb 21 Energy Consumption (kWh)	Mar 20 – Feb 21 tCO₂e
Grid Electricity	460,009	106
Natural Gas	134,979	27
Petrol	93,300	23
Diesel	2,041,464	514
Gas Oil	21,935,236	5,992
Grey fleets	300,817	77
Total	24,965,805	6,739

Scope	GHG Emissions (Mar 20 – Feb 21)	Measurement Unit
Scope 1	6,556	t CO₂e
Scope 2	98	t CO₂e
Scope 3 (including Electricity T&D)	85	t CO₂e
Total	6,739	t CO₂e

Total GHG Emissions for Mar 20 – Feb 21	6,739	t CO₂e
--	-------	--------

Quantification and reporting methodology

Amber's internally derived methodology has been used to ensure compliance with the SECR requirements. The government issued "Greenhouse gas reporting: conversion factors 2021" conversion figures for CO₂e were used along with the figures to determine the kWh from mileage. These are provided within the evidence pack.

Intensity measurement

The chosen intensity measurement ratio is £m turnover. The intensity ratio CO2e/£m turnover for 2020-2021 was 81.

Measures taken to improve energy efficiency

G Walters (Holdings) Ltd continues to strive for energy and carbon reduction arising from their activities. During this reporting period, the group has:

- Ensured that all new heavy plant machines are Tier 4 Engine Compliant. This ensures that the engine is operating as efficiently as possible by controlling the fuel burn and thus reducing the carbon footprint of the machines.
- Introduced operator training program with the aims of maximising the efficiency of the machine and reducing emissions.
- A number of new vehicles that have been purchased over the last 12 months are either Hybrid or Fully Electric. This trend will continue as the fleet is upgraded over the coming years.
- Switched to conducting meetings electronically, to reduce the amount of travel that employees make, and it is expected
 that this will continue in the future.
