Group Energy and carbon report

Emission Type	kWh	CO2e tonnes (location based)
	Current year	Current year
Scope 1: Operation of Facilities	-	-
Scope 1: Combustion	10,224,761	1,883.86
TOTAL Scope 1	10.224,761	1,883.86
Scope 2: Purchased Energy	8,589,852	2,002.64
TOTAL Scope 2	8,589,852	2,002.64
Scope 3: Indirect Energy use	246,301	57.75
TOTAL Scope 3	246,301	57.75
Total	19,060,914	3,944.25

Greenhouse Gas Emissions Intensity Ratio:

Total Footprint (Scope 1, Scope 2 and Scope 3) - CO2e tonnes	
	Current year
Turnover (£)	62,029k
Intensity Ratio (tCO2e/£100,000)	6.36

Our methodology has been based on the principals of the Greenhouse Gas Protocol, taking account of the 2015 amendment which sets out a 'dual reporting' methodology for the reporting of Scope 2 emissions. In the 'Total Footprint' summary above, purchased electricity is reported on a location based method.

• We have reported on all the measured emissions sources required under The Companies (Directors' Report) and Limited Liability Partnerships (Energy and Carbon Report) Regulations 2018 except where stated.

• The period of our report is 30/12/19 – 03/01/21

• This includes limited emissions under Scope 1 and 2 (gas & fuel used in transport; purchased electricity), except where stated, and limited emissions under Scope 3 (fuel used in personal/hire cars for business purposes)

• Energy use and emissions figures relate to our UK operation (including offshore energy and emissions) only, except where stated

• Conversion factors for UK electricity (location-based methodology), gas and other emissions are those published by the Department for Environment, Food and Rural Affairs for 2020.

• Conversion factors for UK electricity (market-based methodology) are provided by the relevant supplier

• Pro-rata estimations have been applied to supplier billing to cover the exact reporting period.

Statement of exclusions

• One site (Hammersmith) has the electricity usage excluded as it is Landlord supplied with no data available for the period.
